## Lathe Maintenance by Dennis Lillis

### The February Program:

### Multi-axis / Offset Turning

Our work generates sap, dust, dirt, pitch, dust, corrosive sap, chips, ...and *dust!*

*And, 90% of needed maintenance involves cleaning the above.*

Dennis showed products and procedures for cleaning, lubrication, and inspection maintenance for all lathe components. The 8 Jet lathes were cleaned by members with help from club experts. Odorless mineral spirits, Scotch Brite, T-9 Boshield, file, sander, rags, towel, toothbrush, mineral oil, paste wax, reamer for Morse taper. Inspection light, Morse taper cleaner, spring center, gloves, and shop towels.

- Headstock
  - ◇ Blow out dust, **Move belt onto low speed range while inspecting for further procedures!** Inspect: belts, pulleys, bearing play, threads, and Morse taper.
- Tailstock, quill, and Morse taper
  - ◇ Inspect for play, clean and lubricate, ream as necessary.
- Lathe ways, gap, banjo, and tool rest.
  - ◇ Inspect for gunk, corrosion, nicks. Clean and lubricate.
- Ancillary Equipment
  - ◇ Inspect drive, live centers and points, and lathe concentricity. Clean threads with compressed air.
  - ◇ Inspect and clean chuck threads and assure symmetric jaw closure. Re-adjust as necessary.

## weekdays with Paul

**an old man, his dream, a tribute to the  
ex-president**

The day was August 23<sup>rd</sup>, 2017. I went to the sawdust session at Barbara's house. As I got out of my car I saw Barbara and Paul Rygaard sitting at the porch chatting. I had met Paul only a few times before since I was new to the club. We all walked in to her living room to start the sawdust session. There were only 4 or 5 of us that day and we had plenty of time to chit chat that evening. It is during that time when Paul asked me the question. "Hari, would you be able to spare a couple of hours each week to help with the pen turning class at the school?". Little did I know then that those couple of hours a week would turn into spending all weekdays with Paul at the school.

During the past year I have come to know Paul very well. My initial thought was Paul is just another member of the club who happens to be the president who also does some volunteer work at the school. But I soon realized that Paul is a man with a mission. Paul is a man with a plan. As each day passed my admiration for him kept growing.

Many of us have witnessed the transformation of the school woodshop over the past year. At the beginning of 2018 the woodshop was a crowded place where the kids did not have much room to maneuver while doing their projects. But things were brewing in Paul's head. He had it all figured out. One day while we were moving a table from the shipping container in the corner of the school campus he confessed "Hari, I am working on my dream shop that I always wanted" to which I responded "Paul, you are putting so much effort into this shop that we should name it 'the Paul Rygaard Dream Shop'". All this transformation did not happen overnight willy-nilly. Paul has many "to do" lists at various stages he keeps and shares with us to track all the changes that are

planned. One thing that impressed me the most is Paul's ability to do almost anything and everything with high efficiency. Whether it be climbing all the way to the rafters to redo all the duct work for the dust collection, rewiring the circuits to add 240v line for the table saw, or opening the power tools to fix them he does it all. He is a master of all

trades. Not everything is rosy though. Paul does forget where he keeps his coffee mug occasionally. Only once did I ever see Paul panic. That was when he lost a ball. Ball bearing that is. While installing the new cutter head for the power planer one of the ball bearings decided to escape. For the next hour Paul ran around the shop (like a chicken with its head cut off) in a panic mode looking for the ball. The sight was not pretty. But at the end he managed to find a replacement ball bearing and got it all working perfectly.

Of all the things Paul does the most striking thing is the synergy he has created with the school administration. Paul has raised the visibility and name of our club within the school administration. It has helped SVW tremendously. We now have a state-of-the-art club house in the school to conduct our meetings and demos. Such a setup other clubs can only dream about. Paul also does a lot of work helping the school administration and shop teacher in planning the budget, helping the kids with their locker assignments, and putting together a new curriculum to teach the kids how to use the CNC machine. The list goes on and on.

It was Paul's dream to have a dream workshop. The school now has a dream woodshop and the kids are enjoying every minute of their time in the shop. And SVW has the dream club house thanks to Paul's dream. Please join me in giving Paul a round of applause and a big thank you for his service to the club as well as to the community.

~Hari~

# 2019 IRONMAN

An IRONMAN is one who successfully completes all 12 President's Challenge projects for the year. Those who meet the challenge are awarded coveted and distinctive IRONMAN name badges. A blue bar in the accompanying chart means that person has completed the project for the month indicated. You needn't be a great turner, you just need to participate. Make something in our Challenge theme and bring it to the next meeting.

# SVW NEEDS YOU!

**It takes more than the officers** and program chairs to make our club function at its best. If your name's not in the column at right, we still need your help in other ways to manage some of the club's activities. This is a HELP WANTED ad, and we need you to respond. There are always things that need doing. In particular, we need:

- Volunteers for shop tours
- Volunteers to present/demonstrate at meetings
- Members to write up their profiles for the newsletter
- Short articles or Tips & Tricks for the *Chips & Chatter* newsletter

Please contact Mike Lanahan to volunteer and help make our activities happen.

**OTHER WOODTURNING CLUBS:** You may use materials in this newsletter for the benefit of other turners. Please credit Silicon Valley Woodturners and the newsletter month and year for any material you use, and mention our web site: [www.svwoodturners.org](http://www.svwoodturners.org). Note that if we've flagged an article as having been reprinted from another source with permission, you must secure that same permission in order to use that material.

## Join Silicon Valley Woodturners

Want to join a great group of turning enthusiasts in an atmosphere of sharing and camaraderie? Become a member of Silicon Valley Woodturners. We meet on the **First** Wednesday of each month. See page 2 for details. Drop in at any meeting and check things out. To join, contact John Whittier (see contact list), or just complete the application form below and mail with check to Grant.
